

LAUNCH PLAN • MAY 2026

Dalelis Mechanical

2.0

A 2-week plan to launch your new website and reach 4,400+ existing customers — by email and text — with your new maintenance plans.

Prepared by

FieldPass

For

James A. Dalelis, Owner

Three moves, one momentum.

Each builds on the last to turn your existing list into recurring revenue.

01

New website goes live

Replaces Webflow with a faster, more modern site

Same domain. Same content. Loads twice as fast and looks unmistakably like a 2026 business — not a 2018 business.

02

Maintenance plans launch

Three tiers, online payment, instant signup

Customers pick a plan, pay with a credit card, and you get the booking automatically in HousecallPro. No phone tag.

03

Email + text campaign

Reach 800 customers by email, 3,600 by text

A short, personal message from you — first by email, then by SMS to a wider list. Sent in waves to maximize replies and inbox delivery.

PHASE 01

Your new website, *live in a day.*

We've already built and tested the replacement at dalelis.vercel.app. The migration itself is a 2-hour window where we point your domain at the new site. No content is being rewritten — just delivered better.

BEFORE · WEBFLOW

- ✗ \$30/month subscription
- ✗ Slow page loads
- ✗ No online plan signup
- ✗ No payment integration
- ✗ Looks like a 2018 site

AFTER · NEW SITE

- ✓ \$0/month hosting (Vercel)
- ✓ Loads in under 2 seconds
- ✓ Online plan signup + payment
- ✓ Mobile-perfect everywhere
- ✓ Built-in tracking + analytics
- ✓ Editable text, photos, prices

Reaching the people who already know you — by email.

1

Export your list

We pull all 800 customers with valid email from HousecallPro.

2

Personalize

Every email opens with their first name, signed by you.

3

Send in waves

100 per day for 8 days — keeps emails out of spam.

4

Track everything

Opens, clicks, signups — visible to you in a dashboard.

Goal: 100 emails per day → 800 customers reached in 8 days. Email goes out FIRST while SMS approval is pending in the background.

A short letter — not a marketing blast.

FROM: james@dalelismechanical.com
SUBJECT: Charles, a small thank-you from Dalelis

Hi Charles,

It's James — owner of Dalelis Mechanical. You've trusted us with your heating in the past, and I wanted to share something new with you before it goes public.

We just launched maintenance plans.

- ✓ Annual or seasonal tune-ups
- ✓ 10% off any repairs all year
- ✓ Priority emergency scheduling
- ✓ Plans from \$19/month

[See the plans →](#)

— James A. Dalelis

WHY THIS WORKS

✓ Personal, not promotional

Sent from your real address, addresses them by name. Looks like a letter, not an ad.

✓ One single ask

Just one button — see the plans. Cluttered emails get sent to spam.

✓ Direct reply works

Customers can reply and reach you, not a noreply inbox. Boosts trust and inbox placement.

✓ Sent slowly on purpose

100/day instead of 800 at once. Avoids spam filters and warms up your sender reputation.

Doubling reach with a quick text.

3,600 contacts in your CRM have phones but no email — text reaches them directly.

1

Carrier approval

We register Dalelis with cell carriers (required for mass text — runs in the background, no work for you).

2

Personalize

Each text starts with the customer's first name. Identifies as Dalelis right away.

3

Send in waves

300 texts per day for 12 days. Keeps deliverability high and gives you time to handle replies.

4

Click-tracked

Every link is unique, so you see exactly who clicked and from which message.

One caveat: cell carriers require a 1-week approval for mass SMS. We submit on Day 1, send on Day 8 — runs in parallel with email so there's no idle time.

Short, direct, identifies as you.

WHY THIS WORKS

✓ Identifies as you up front

First 12 characters say 'Dalelis HVAC:' — recipients know who it's from instantly.

✓ Short and direct

Under 320 characters. Costs 1¢ to send and gets read in 3 seconds.

✓ One link, click-tracked

Every recipient gets a unique URL — you'll know exactly who clicked through.

✓ Legally compliant

Required 'STOP to opt out' is included. Sent only to customers who've called you before.

PROJECTED RESULTS

Conservative estimates from
the first 30 days.

EMAIL • 800 CONTACTS

770

Delivered

380+

Opens (49%)

55+

Clicks

8–15

Signups

TEXT • 3,600 CONTACTS

3,500

Delivered

3,400

Read (98%)

540

Clicks

15–35

Signups

Combined: 23–50 new plan signups • estimated \$9,000–\$20,000 in year-one revenue

From kickoff to inbox to text in two weeks.

Email starts immediately. Text approval runs in the background — no idle time.

DAYS 1 - 2

Foundation

Stripe goes live. We wire up payment + HCP sync. SMS carrier registration submitted (runs in background).

DAY 3

Website live

DNS cutover (2-hour window). Site goes live at dalelismechnical.com. Webflow stays running 72hr as safety net.

DAYS 4 - 5

Friends & family

Email goes to 50 hand-picked loyal customers first. Gather feedback. Tune the copy.

DAYS 6 - 10

Email campaign

100 emails per day to remaining 750 customers. Replies hit James's inbox.

DAYS 8 - 14

Text campaign

Carrier approval clears. 300 texts per day to 3,600 contacts. Click-tracked.

Six small steps. ~2 hours of your time.

1	Set up a Stripe account stripe.com — 15 min. Verify your business + bank info so we can route customer payments to you.	15 min	James
2	Export customers from HCP Settings → Customers → Export CSV. We'll filter to email-valid and phone-valid contacts.	5 min	James
3	Sign off on email + text copy We'll send you final drafts for approval. You can tweak any wording.	15 min	James
4	Confirm SMS carrier registration You'll get a one-time form from Twilio asking to verify your business name + use case. Auto-filled by us.	10 min	James
5	Hand off DNS access Whoever manages dalelismechanical.com DNS gives us 1 hour to update records.	30 min	Domain admin
6	Be on call for the launch Day 3 cutover: be reachable so we can fix anything weird in the first hour. Usually nothing comes up.	1 hour	James
